ITALIAN PAVILION AT

SAOGE 2016

Dammam, 17 - 19 October 2016

Ambasciata d'Italia a Riad

Dear Visitor,

I wish to warmly welcome you to the Italian pavilion at SAOGE 2016.

Endowed with little natural resources, Italy has nevertheless developed over decades a strong and advanced oil&gas industry. To mention but a few examples, we boast leading oil&gas engineering service providers, drilling rigs producers and machinery and equipment manufacturers for the energy industry. As evidence of this, it is worth mentioning that machinery and refined products have always topped the figures of Italy's export to the Kingdom in recent years. Energy lies at the core of both our bilateral trade and the activity of Italian companies in the Kingdom.

Italy's economic and commercial relations with the Kingdom of Saudi Arabia are growing stronger and our countries are keen to further explore new business and investment opportunities within the framework of Vision 2030 and the National Transformation Plan. In light of Italy's proximity to the Kingdom and our prominent expertise in this field, the oil&gas sector is one of the most promising areas of business between our countries. The Embassy of Italy in Riyadh, our Consulate General in Jeddah and the Italian Trade Promotion Agency in Riyadh are ready to support Saudi businesses in dealing with their Italian counterparts with a view to achieving mutually beneficial results.

Enjoy your visit at SAOGE 2016!

FULGOSI S.R.L.

Founded in 1974, FULGOSI S.r.l. is a dynamic company which operates in the field of manufacturing device & components for the petrochemical industry. The core business is represented by the engineering and fabrication of Quick Opening Closures (Q.O.C.) for pressure vessels, Pig Launcher & Receivers (Traps), Gas Dehydrators & Filters (Dryers); Flow Straighteners and other related products in both Carbon and Stainless steel.

The aim is to develop products and advanced service as completely integrated solutions. Our high pressure Quick Opening Closures are designed, engineered and manufactured according to the most stringent international standards applicable to the Pressure Vessels for Oil, Gas and Petrochemical industry, but the revolution is represented by the integrated services so as to assure the best performance during the entire device life cycle in both terms of severe conditions as well as longest durability.
